R. Henry Moore, Attorney at Law, Jackson Kelly PLLC

The Pittsburgh Coal Mining Institute of America (PCMIA) was formed in 1976 as a result of the merger of the Pittsburgh Coal Mining Institute and the Coal Mining Institute of America. Its objective is to encourage education and the growth of knowledge relating to coal mining including providing scholarships, to advance study and research into mining methods and problems, to promote safety and efficiency in the coal mining industry, to encourage closer cooperation between the coal industry and State and Federal government agencies, to disseminate information relating to the coal mining industry, and to otherwise advance the mutual interests of the members of this association.

The Pennsylvania Coal Association (PCA) is a trade association representing producers of bituminous coal in the Commonwealth in legislative and regulatory matters affecting the coal industry. Its members produce over 75% of the bituminous coal annually mined in Pennsylvania. The PCA also represents associate members who provide services to the coal industry ranging from engineering and consulting to finance, insurance and the sale of mining equipment.
